Election/Restrictions

- I. Claims 1-28, drawn to an Organic Light Emitting Device, classified in class 313, subclass 506.
- II. Claims 29-49, drawn to method of manufacturing an organic light emitting device, classified in class 427, subclass 66.

The inventions are distinct, each from the other because of the following reasons:

Inventions 29-49 and 1-28 are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case for claims 29 and 41, a step of RF induction can be added either in replacing the annealing step or in addition to the annealing step for a period of 1 hour.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Jacob Doughty on May 02, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
